

The **Australian Society of Plant Scientists** (ASPS) promotes plant science in Australia and encourages communication within the community of researchers and teachers through:

- Annual **ComBio** meeting
- Regular newsletters
- Close affiliation with the journal **Functional Plant Biology**
- Publishing books and teaching material
- **Website** ([www.asps.org.au](http://www.asps.org.au))
- Research and teaching **awards**, and student poster prizes

ASPS has 450 members covering 9 discipline areas:

- cell/tissue physiology
- cell biology
- genetics/molecular biology
- plant development
- whole plant
- plant-microbe interactions
- environmental biology & ecophysiology
- global change
- plant science education

ASPS has a close affiliation with

## FUNCTIONAL PLANT BIOLOGY **FPB**

An international journal (continuing Australian Journal of Plant Physiology) for contributions in all areas of plant physiology

ASPS members are eligible for a special reduction on personal subscriptions to Functional Plant Biology! See website for more details:

[www.publish.csiro.au/journals/fpb/](http://www.publish.csiro.au/journals/fpb/)

Want to join

Download a membership form from the ASPS website ([www.asps.org.au](http://www.asps.org.au)) and start enjoying the many benefits we offer to our members (check out our very low rates for students!):

- **Reduction on ComBio registration fee**
- **Reduction on subscription to Functional Plant Biology**
- **Student travel grants**
- **Sponsorship for workshops and specialist meetings**
- **Lower rates for advertising employment on website**
